

**REFIK
ANADOL**

BIO

Refik Anadol (b. 1985, Istanbul, Turkey) is a leading and award-winning media artist whose creative practice focuses on the exploration of digital aesthetics within the realm of artificial intelligence and machine learning. Anadol trains his machines by exposing them to data sets based on a plethora of real-world images which include natural wind patterns, bluetooth signals, and even scans of the human brain. As the artist's machines and aesthetic evolve, the artist reflects on the realities of technological advancement and humanity's ever-evolving relationship with artificial intelligence.

An award-winning artist, Anadol is considered a pioneering innovator within the digital art movement, with his immersive and dynamic digital installations having been exhibited in major Museums and Cultural Institutions internationally such as the MoMA in New York, Venice Architecture Biennale and the NVG in Melbourne.

The artist's work is rare and now among some of the most sought after works of art both by digital art collectors and traditional art collectors alike, with his work Machine Hallucinations – Space : Metaverse, selling at Sotheby's Hong Kong in 2021 for 2,353,864 USD.

YAWANAWA X REFIK ANADOL

In a remarkable & unparalleled artistic collaboration, Refik Anadol will co-create a series of 1000 unique immersive Data Paintings harnessing weather data from the Yawanawa community's village of Aldeia Sagrada in the Amazon rainforest, such as wind speed, gusts, direction, and temperature. This data then merges with the works of young Yawanawa artists, resulting in a mesmerising play of traditional shapes and colours of data pigmentation.

Each NFT will be composed of a video and sound variation derived from the series' central artwork, the Winds of Yawanawa Data Sculpture. Central to the creative process of his piece are the young Yawanawa sisters Nawashahu and Mukashahu, whose artworks form the foundation and visual inspiration of the Winds of Yawanawa Data Sculpture, combined with traditional Yawanawa chants.

The artworks' movement and composition will continued to be influenced by real-time weather data from Aldeia Sagrada, making them living and dynamically evolving representations of the Yawanawa identity and the community's connection to their Amazonian territory - a fundamental ecosystem for all of humanity.

- Format: 4k Resolution Video File | 8 minute loop, Original music
- Signed Certificate of Authenticity
- Unique from Edition of 3
- \$ 650,000.00
- Option to acquire with screen upon request

IMPACT AND LEGACY

A limited collection of 1000 NFTs will be made available from this unprecedented collaboration, each unique in their own right, and with a significant potential for appreciation in value due not only to the artist's well-established profile and historical performance of his works at auction but also the long-term aims of this project.

Yawanawa x Refik Anadol's dynamic and multi-sensory works stand for planetary sustainability and for the protection of one of the Earth's most vital ecosystems, with the goal of developing regenerative business models using blockchain technology to support indigenous communities' and the stewardship of their lands.

The artist Refik Anadol and project initiator Impact One are waiving their full share of the revenues, to donate the full creator's share to the Yawanawa community. The funds will be used by the Yawanawa chiefs to support long-term initiatives for the protection of the Yawanawa lands and cultural heritage. Activities funded by the sale include the hosting of a historical convening amongst Indigenous Peoples of the Amazon taking place in the Yawanawa Sacred Village in 2024.

MARKET PERFORMANCE & ANALYSIS

Comparison of Artwork Prices Across Price Points

Compares the proportion of lots sold across price ranges to the proportion of total value they generate. The chart shows whether an artist's market over the last ten years has been driven by the sale of a small number of expensive works or a large number of inexpensive works.

COURTESY OF MUTUAL ART

Refik Anadol's work has sold at auction and achieved important results in Asia, USA and Europe.
In 2021, more than 80% of the lots offered at auction for the artist's work sold above the presale estimate.

Auction Insights: Geography of the Art Market

The artist's auction history provides insight into the relevant art market landscape, offering a comprehensive overview of the geographic art market.

Sold Lot Performance Against Estimate

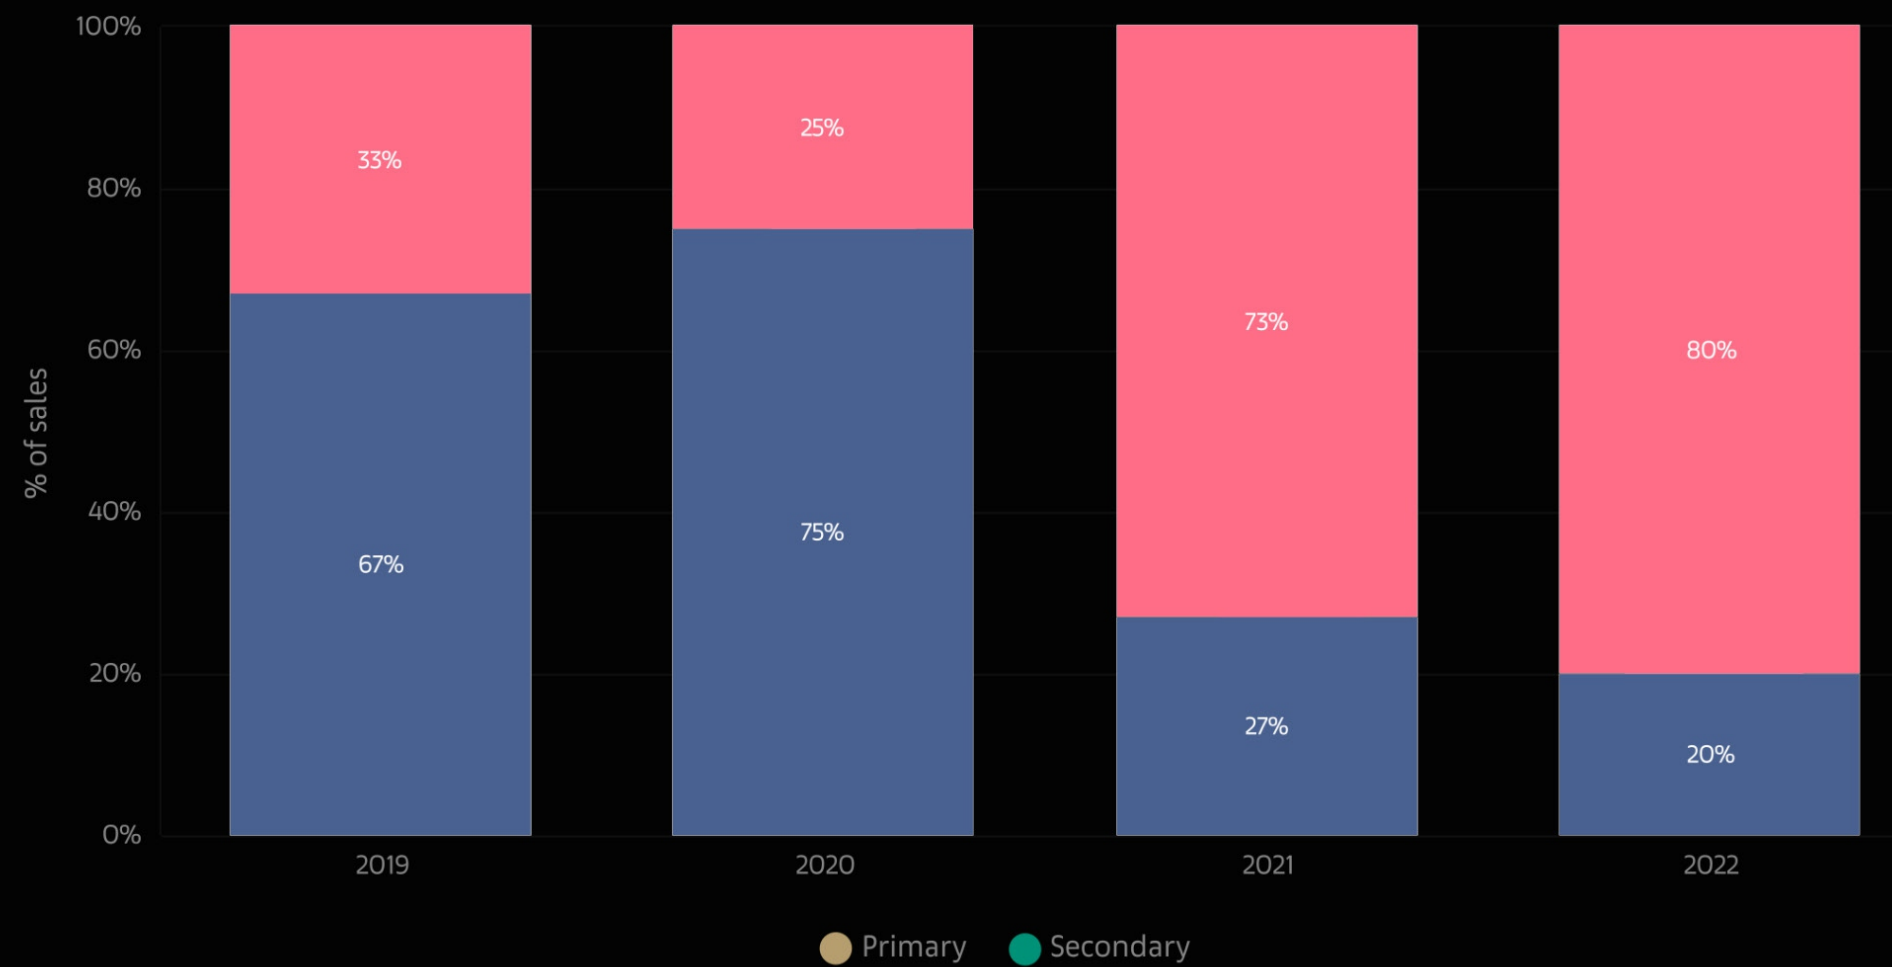

Tracks the performance of lots against their estimate, indicating how many sold within, above or below this range, or remained unsold. This chart shows how the artist's market performed compared to pre-sale expectations.

Secondary sales of art-related NFTs accounted for 80% of the market's value and 61% of transactions in 2022, underlining that reselling is now the dominant activity on these platforms (UBS Art Market Report 2023)
